

Halves Coffee Table

“With the Halves Coffee Table, we wanted to work with terrazzo not just as a surface, but as a substance — something elemental, almost geological. It’s a material with permanence, rich in history, yet open to contemporary expression. The table’s form is clean and minimal, but also slightly off. There’s a deliberate asymmetry that introduces a quiet tension. It’s not just about balance, but about giving the material a shape that feels unexpected and lasting.”

Designed by	MSDS Studio
Environment	Indoor And Outdoor
Country of Production	Turkey
Description	The Halves Coffee Table blends sculptural form with enduring materiality, creating a versatile statement for any setting. Crafted entirely from terrazzo, it offers a tactile, stone-like surface that is both durable and refined. Available in soft off-white or light taupe, the design harmonizes effortlessly with a wide range of interiors and outdoor spaces. Its geometric silhouette doubles as a playful display stand, uniting architectural presence with everyday functionality.
Material	The coffee table is crafted from high-quality, cement-based terrazzo and treated with a water and oil repellent stone sealer. Terrazzo consists of natural stone chips set in a resilient cement matrix, resulting in subtle variations in pattern, color, and texture that make each table unique. The table’s smooth, solid finish is suitable for both indoor and outdoor use. When placed outdoors, the material will naturally weather and develop a distinctive patina over time. The table is fitted with plastic glides suitable for indoor and outdoor surfaces.
Cleaning & Care	To clean the table, the surface should be wiped with a cloth dampened with water. If needed, only a mild detergent or dish soap may be used. After cleaning, the surface should be dried thoroughly with a soft, clean cloth to remove any remaining moisture and prevent water spots. Spills, grease, or residues should be removed immediately to reduce the risk of stains and discoloration. Extended exposure to humidity, heat, or direct sunlight may gradually alter the appearance of the terrazzo. The table should not be placed near heat sources. Hot, wet, or metal objects should not be placed directly on the surface, as they may cause marks. The tabletop is treated with a water- and oil-repellent stone sealer. If additional protection is desired, a stronger stone sealer can be applied. Advice on product selection and application should be obtained from a local hardware store.
